Before we started with Truck Parts Inventory, we used an old software system to categorize our parts. It was difficult to navigate and our parts counter guys couldn't even use it. They would have to ask us to look up parts for them. When we were busy it was a nightmare to try and track down parts on our huge salvage yard. Then we discovered TPI.

TPI is so easy to use – our parts counter guys can quickly search parts on the computer and find them in our yard. Truck Parts Inventory provided us with a tag printer so that we can start to label our parts with stock numbers. Their technicians answered all the questions we had when setting up the printer. Truck Parts Inventory has helped us organize our business and given us the tools to sell more parts.

Invoicing has become ten times faster with TPI because it is simple to use and not as complex as our old system. The staff at TPI is always there to help us whenever we need assistance.

We recently decided that we wanted to put trailers on TruckPartsInventory.com. TPI has been extremely helpful adding different trailer models that weren't already on their system. This is just one of the ways they have helped us keep our inventory organized and up to date.

We feel like TPI has taken the time to get to know our company, our parts, and our business needs. They have been a huge support in advertising our parts to a much larger market. TPI even hosted us at their office one day. It was great to get to know their friendly staff over lunch. It is nice to know that real people manage TPI and are there to support us.
